

The power of colostrum

The powerful bioactive components in bovine colostrum offer a wide variety of beneficial effects that are well documented in both human and animal scientific literature. Many physiological challenges can be effectively overcome through rich and diverse bioactive components from colostrum that include:

- Antimicrobial growth factors
- Immunoglobulins
- Lactoferrin
- Cytokines
- High levels of proteins
- and many more

Whether a horse is actively training or casually ridden on weekends, research and real-world experience confirm the power of colostrum for some types of recovery and overall physical support.

Digestive support

Respiratory maintenance

Muscle recovery

Digestive health

Hoof health

Bone density support

Immune support

Encourages focus and calm

Colostru-Boost™

Our colostrum source assures quality and potency

Maternally-derived bioactive compounds in Colostru-Boost come from first-milking bovine colostrum. Very early colostrum collection assures the highest levels and concentrations of bioactives that will have the most significant effect on meeting a horse's needs.

ColostruGold® certification is your assurance of the bioactive source and potency. No other product provides this peace of mind.

Veterinary nutraceuticals

Nutraceuticals¹ consist of natural compounds that offer potentially advantageous effects related to animal health and productivity, for example disease resistance through immune modulation, decreased disease pressure, and support in healing. Colostru-Boost products offer veterinarians and horse owners powerful non-pharma options.

Colostru-Boost™

by TechMix

Introducing a new generation of equine support.

Colostru-Boost products are designed to meet a variety of needs a horse encounters. Powerful bioactive components from colostrum are combined with additional nutrients and ingredients including energy sources, probiotics, and more—all designed to boost horse performance and well-being.

Colostru-Boost is next generation support built on the engine of colostrum.

Product options that give choices to you and advantages to your horses.

Product

Description

Benefit

Protection Paste

Contains bioactive components from colostrum that support a healthy digestive tract.

CONTAINS:
Colostrum

- Works to protect and support a healthy digestive tract
- Supports immune function

Performance Powder

Formulated with bioactive components that provide cellular support for muscles while also addressing foregut and hindgut integrity.

CONTAINS:
Vitamin E, Colostrum, Probiotics, Biotin

- Cellular support for muscles
- Promotes healthy digestive tract
- Supports blood oxygenation
- Maintenance of hoof health

Recovery Pellet

Leverages the power of plasma proteins and bioactive components to support the stomach, a healthy digestive tract, and a calming influence.

CONTAINS:
Colostrum, Plasma Proteins, Probiotics, Glutamine

- Works to protect stomach
- Promotes healthy digestive tract
- Encourages focus and calm
