

# Natu-Lax®

Fortified psyllium supplement to promote enteric lubrication when sand colic is present.

Horses that are prone to colic events or live in sandy regions need extra support to ensure that their digestive system remains healthy. Natu-Lax® can be used as part of a regular maintenance program to help avoid colic events. Made from high quality psyllium husks and seeds with maximum swell factor and optimum lubrication, Natu-Lax is a premium product that helps to move indigestible material through horses safely. Adding Natu-Lax to feed on a regular, monthly basis is an easy way to ensure the continuity of digestive health for your horse.

**PELLET KEY FUNCTIONAL COMPONENTS:** Psyllium Husks, Psyllium Seeds

**POWDER KEY FUNCTIONAL COMPONENTS:** Psyllium, Probiotics, Vitamins, Minerals, Biotin

## FEATURES & BENEFITS

- Premium quality psyllium seeds and husks
- Fast acting swell factor that creates the instant lubrication that helps move indigestible material safely through horses
- Administering Natu-Lax as part of a monthly maintenance program helps to avoid the need for more extreme measures that are required when a colic event occurs
- By administering regularly, horses can better avoid issues caused by buildup of indigestible materials
- Natu-Lax Powder is formulated to help restore and maintain normal digestive tract micro-flora with microbial-yeast-enzyme fortification

## WHEN TO USE

- Daily or as part of a monthly maintenance program
- For horses that live in sandy climates and regularly ingest sand and debris
- For horses that are on stall rest
- For use during worming
- For post-operative horses
- To encourage a healthy digestive system

## DIRECTIONS FOR USE

### PELLET:

#### Monthly maintenance -

Give one scoop daily for seven consecutive days of every month. (repeat monthly)

#### For use when sand colic is present or for horses at greater risk -

Give 2 scoops daily, consult your veterinarian for further recommendations.

### POWDER:

#### Top Dress -

Feed 4-6 ounces daily with the regular ration. Continue providing for 7-10 consecutive days and repeat as needed.

#### Veterinary Application Only -

Reference label directions.

\*Suggested usage rates are based on a 1,000 lb horse. Adjust accordingly.
