

# Restart® GutBugz

A supplemental source of probiotics that contains 25 billion live bacterial cells per ounce to help support gut health.

Keeping a horse's digestive system populated with beneficial bacteria is a great way to ensure that the horse has a balanced digestive environment. By promoting that balance, you generate feed intake consistency to better utilize vitamins and minerals, supports their natural immune system, and maintain overall health and body condition. Help to create a normal digestive environment by providing Restart® GutBugz probiotic for horses, a powder that can quickly infuse the gut with the live bacteria cells and active enzymes needed to support the digestion of nutrients.

**KEY FUNCTIONAL COMPONENTS:** Probiotics (25 billion colony forming units), Enzymes

## FEATURES & BENEFITS

- Includes beneficial bacteria such as *Saccharomyces cerevisiae*, *Lactobacillus acidophilus*, *Lactobacillus lactis*, *Enterococcus diacetylactis*, *Enterococcus faecium*, *Bifidobacterium bifidum*
- Contains combination of lactic-acid producing bacteria, enzymes, FOS (fructooligosaccharides) and yeast to support a healthy digestive tract
- Complimentary to nutrition programs
- Helps to repopulate and restore good bacteria in the gastro-intestinal system to help maintain weight and condition
- Quickly populates the intestinal tract any time that gut balance needs to be restored
- The natural supplement for horses of all ages, especially during times of transition

## WHEN TO USE

- During transport, changes in housing or environment, or a change in routine
- To enhance feed utilization, improve appetite, or when changing forage or feed
- Any time a horse needs a boost to maintain digestive health
- To jump start the immune system and naturally combat bad bacteria
- After de-worming or antibiotic use
- After the 7-day Equine Natu-Lax purge
- Before and after surgery

## DIRECTIONS FOR USE

Mix 1/2 oz into feed on a daily basis. Suggested usage rates are based on a 1000 lb horse, adjust product usage according to body weight of horse.
