**WHEN TO USE**

- Encourage water intake and maintain hydration
- Ease the transition to weaning
- To promote clot formation of milk nutrients to help utilization of milk solids
- To enhance digestion and optimize nutrient utilization
- For purchased calves to ease the transition
- Add to water during the summer and winter months for added energy
- For daily hydration maintenance to provide extra fluids during scours

**FEATURES & BENEFITS**

- Provides acidified electrolytes and readily digestible energy
- Aromatic blend of pH adjusted electrolytes that are compatible with milk or milk replacer feedings
- Contains multiple energy sources
- Provides fat, energy, and electrolytes in a simple digestible form to help calves grow and start to build up reserves

**KEY FUNCTIONAL COMPONENTS:** Electrolytes, Acidification, Multiple Energy Sources

**QUICK REFERENCE**

- Quickly hydrates young calves and promotes optimum electrolyte and fluid balance
- Helps support healthy immune system development for pre-weaned calves
- Designed to help reduce shrink and dehydration in young calves
- Field trials have proven a reduction in losses due to dehydration by 4-10%

**DIRECTIONS FOR USE**

For dehydrated calves, provide 2 ounces of BlueLite C to every 2 quarts whole milk, milk replacer, or water consumed on a daily basis. When giving fluids via an esophageal tube or by drenching, mix the fluids and the BlueLite C to provide one ounce of BlueLite C powder for each 20 pounds of body weight.
