

Revitalizing nutrition & health

TechMix Equine

Give your horse good health all year long.

"I love Equine Restart™! It's the all-in-one product that my horses need to stay healthy and looking their best!"

"The best part of Equine Restart is that it has multiple uses," says Lynne Peck of Good Year, AZ. "Probiotics, fatty acids, electrolytes, antioxidants... it has everything!" Peck is a proud owner of two quarter horses and one Shetland pony, and currently resides on a two and a half acre farm. She has been in the equine industry for over forty years and does team sorting, trail rides, and much more. She has been a Veterinarian Technician for over twenty years and in 1999, Peck was AZ Large Animal Vet Tech of the year. Peck is part of the international Buckskin Horse Association and attended the Buckskin World Show twice.

"Equine Restart truly is an all in one product!" says Peck. "I like to keep things simple. I don't want to buy fifteen different products and over supplement - that's why Equine Restart™ works for me."

Equine Restart contains microbials which help to improve feed utilization and digestion, increase performance and endurance and improve hair coat and overall health and appearance. "Since on Equine Restart, I've noticed a big difference in my horses hair coat," says Peck. "In the middle of December, their coats are still shiny and look like they would in the middle of the summer."

Equine Restart helps improve the immune system function with vitamins, organic selenium, chelated copper and zinc. "It makes my horses look really healthy," says Peck. "My horses haven't experienced any stomach issues since I've started using the product and it really helps the horses maintain their weight."

Equine Restart™ is top dressed daily to improve or maintain the overall health of Peck's horses. "It is so important to me that my horses look great, are healthy and are easy to care for with Restart. I only have to feed one product to get everything I need for my horses," says Peck. "More or less, Equine Restart helps my horses to be 'easy keepers' - and I love the product for that!"
